

Dr. Hazza Alharbi: Received his Master and PhD. In Electrical Engineering from King Saud University in 2004 and 2013 respectively. From 1997 until 2008 he worked in MoD as a communication Engineer and signals analyst. During this period, he participated in various research and development projects. In addition, he joined a number of professional training courses in different engineering fields such as microwave, signals analysis, maintenance, and Electronic Warfare (EW). In 2009, he worked in Prince Sultan Advanced Technology Research Institute (PSATRI) as a part time researcher. Since 2010, his work is concentrating on EW systems. Currently, he is a consultant of EW and signals analysis. His research interest includes Digital Signal Processing and Pattern Recognition. He is a member of IEEE Aerospace & Electronics Systems Society (AESS), and Association of Old Crows (AOC). He published several journal and conference papers.
